

# CAMERAS INSTALLATION PROJECT

## SECURITY SERVICES

Design and installation of 160 cameras to monitor and control sensitive areas that contain special machines requiring constant surveillance, under a very tight schedule.

The project included:

- Project design
- Working closely with the space management team in order to receive final approval for installation
- Coordination with IT, safety & security department
- Purchasing all project material
- Installation of cameras including associated infrastructure
- Integration of all cameras to the control system
- Start-up, F.O.V, testing & commissioning
- Delivery on time
