

# ENZYMATIC BIODIESEL PLANTS

Meptagon and Trans Bio Diesel have entered into a partnership in order to consolidate the advantages and benefits of each company. This partnership will provide a comprehensive solution for customers, from the early design stages through to implementation of the plant and completion of commissioning (Turn-Key Project).

Meptagon has over 60 years of experience in design, plant engineering and construction in the industry (EPCM). Trans Bio Diesel has many years of experience in the development of immobilized enzymes while providing engineering support to biodiesel plants.

The Trans Bio Diesel and Meptagon partnership will provide solutions to customers in a number of sectors:

- Factory planning / design
- Upgrading / retrofitting of existing plants to Enzymatic plants
- Construction of new plants
- Plant operation
- Overall engineering responsibility for process, product quality and production facility
