

AUTOMATION AND PROCESS CONTROL

We specialize in developing PLC solution according to S00, engineering and process consulting for control systems, developing control and automation systems for building management, developing graphical operations and control systems, data collection and processing in production rooms, and all-round solutions for real-time analysis of manufacturing data. We stand out in our ability to provide optimized advanced solutions for a broad range of systems. This includes in-depth analysis by high standards and quality professionals who will take all it needs to improve efficiency and enhance existing control systems and processes.

MAIN SERVICES

- Design PLC systems based on S00 (sequence of operation) using P&ID (piping and instrumentation diagrams)
- Design, develop and support Command and Control systems
- Develop applications based on GE, Allen Bradley, Siemens controllers and other top PLC manufacturers
- Develop graphical control systems based on HMI/SCADA platforms
- Develop OPC/ telecommunications protocols
- Supply building management systems (BMS) including design and implementation of building control
- Develop automation systems based on the Delta V platform
- Cyber solutions for control systems
- Design and build control panels
- Build custom-designed control centers

MEET MEPTAGON GROUP

Meptagon Group provides a one stop shop for industry's needs and integrated project services. We execute multi-disciplinary turnkey projects worldwide, through our five divisions:

- Management
- Design & Engineering
- Construction
- Agencies
- Subsidiaries

Meptagon employs more than 450 people with various skills. Each division in the group has unique requirements and employees are carefully selected in order to complete their tasks meticulously. However, the ability to share knowledge among employees and further enrich the capabilities of their peers is a core strength of the Meptagon Group, which is unmatched in the industrial world today. Meptagon's employees are our, and our customer's, most important resource. Every day our employees serve our customers in a loyal, professional and fair manner, in order to fulfill the company's vision.

Cleanroom & Contamination Control

Provides one-stop-shop services that include initial advice, clean room design, construction and installation services as well as modification or refurbishment of existing facilities.
