

Recording and Investigation System

RECORD & VOD

The Meptagon Group's services are custom tailored to suit each client's varying technological and commercial requirements. Meptagon Group's experts provide innovative, effective and technologically advanced solutions for interrogation rooms for **all entities conducting interrogations including: police, security services, insurance companies and more...**

The Solution

An innovative system for recording overt and covert investigations in a simple, user friendly way. The system has a distributed, web-based management interface and the ability to synchronize audio, video and metadata stored in an encrypted database.

System Advantages and Capabilities

- HD quality video and high-quality audio with the background noise filtering capabilities
- Permission-based SSL and HTTPS protected streaming
- Physical shutdown mechanism for the recording equipment to prevent unauthorized recording
- User friendly interface
- Automatic DVD disc creation and investigation report generation
- PDF-based investigation reports
- Web-based storage and viewing of recorded investigation data
- Open platform for interfacing with third-party recording systems
- Support for watermarks
- Support for digitally-signed investigation reports
- OTA synchronization and transcoding
- Cyber protection and encryption
